BUSINESS INTELLIGENCE DEVELOPER - POWER BI DEVELOPER

Power BI Developer with 8+ years turning complex data into reports, dashboards, and semantic models for retail, energy, aerospace, financial services, grocery, and construction teams. Hands-on with DAX and Power Query, connecting Power BI to Snowflake, Databricks, Oracle, and SQL Server data. Works end to end, from requirements gathering through deployment.

Areas of Expertise

Skills: Business Intelligence | Data Modeling | Data Warehouse | Data Management | ETL / Data Pipelines | Data Quality & Validation Performance Metrics | API Integration | Process Automation | Test Automation | Software Engineering | SDLC | Agile Methodologies | DevOps

Technologies: Power BI | Power BI Report Builder | Paginated Reports | Power BI Copilot | Power Query (M) | DAX | DAX Studio | Tabular Editor AI Visuals | Microsoft BI/Azure BI | SQL | T-SQL | Query Optimization | SSIS | SSRS | SSAS | Snowflake | Databricks | Oracle | Tableau | Salesforce Excel | Azure DevOps | Git / GitHub | Visual Studio | Python | PowerShell | REST APIs | Google Workspace APIs | Playwright | JSON / XML | Claude

Professional Experience

ABERCROMBIE & FITCH CO. | Denver, CO - Remote - Contract — Dec 2023 - May 2026

Senior Power BI Engineer

Core developer on the enterprise-wide COMET reporting migration, A&F's largest BI initiative in a decade, building Power BI reports and data models to replace legacy dashboard infrastructure across the organization.

- Engineered star schema semantic models in Power BI using DAX and Snowflake, with Row-Level Security and incremental refresh, enabling self-service reporting across the organization and reducing reliance on the central BI team for ad-hoc analysis.
- Maintained and tuned production Power BI reports and models with DAX Studio and Tabular Editor, releasing changes through deployment pipelines and partnering with stakeholders to resolve schema conflicts and align models with evolving business requirements.
- Deployed Power BI Copilot and Q&A to enable natural-language querying, using Key Influencers and decomposition tree visuals to surface the drivers behind key metrics.

INSIGHT ENTERPRISES | Denver, CO - Remote - Full-time — Aug 2022 - May 2023

Senior Software Engineer

- Delivered enterprise analytics solutions for external clients across multiple industries, designing and deploying 10+ interactive Power BI dashboards, KPI frameworks, and semantic data models tailored to client-specific business requirements.
- Developed end-to-end BI solutions leveraging DAX, SharePoint, and Azure DevOps, translating complex client data into actionable executive-level insights and self-service reporting capabilities.
- Applied Power BI AI visuals, including anomaly detection and Key Influencers, to surface outliers and trends clients would have otherwise missed.

COMPUTERSHARE LIMITED | Greenwood Village, CO - Hybrid - Full-time — Sep 2021 - Aug 2022

Business Intelligence Developer

Delivered tailored BI packages leveraging the full Microsoft BI stack (SSAS, SSRS, SSIS, Power BI, and Power Apps) to drive data-informed decision making across business units.

- Built and maintained 15+ Power BI reports and dashboards end to end, from requirements gathering through deployment on Power BI Service and Report Server.
- Worked within SAFe Agile development practices using Azure DevOps and Git for version control and release workflows across the BI team.

OPPENHEIMER COMPANIES INC | Denver, CO - Remote - Contract — Jul 2021 - Sep 2021

Power BI Developer

- Delivered Power BI reporting solutions for a grocery sector client, analyzing sales datasets to identify best-selling products and surface actionable profitability insights across key business segments.

HALLIBURTON COMPANY | Fort Lupton, CO - Hybrid - Contract — Mar 2020 - Feb 2021

Power BI Developer

Supported mission-critical North America datasets and reporting infrastructure, keeping data pipelines available for 24/7 internal logistics and operational workflows.

- Helped design and deploy a customer-facing Power BI reporting platform processing 20K+ frac stages of data, implementing Row Level Security (RLS) to deliver personalized, secure data access across 30+ external clients.

- Designed and published enterprise-grade reports and dashboards consumed by both internal stakeholders and external customers at all administrative levels, leveraging DAX, SQL, and Azure DevOps within a Power BI environment.
- Implemented Azure Blob Storage monitoring to track report usage and user access patterns across BI products, enabling data-driven decisions around platform growth and feature prioritization.
- Worked across the Azure BI ecosystem (Azure Data Factory, Azure Analysis Services, Power BI, SSIS, and SSRS) to support North America-wide data operations and around-the-clock logistics reporting.

SIERRA NEVADA CORPORATION | Louisville, CO - Onsite - Full-time **Jul 2018 - Mar 2020**

Data Analyst II

- Designed and delivered Power BI reports and dashboards spanning multiple business areas, translating large, complex datasets into clear visualizations for executive and managerial decision-making.
- Partnered with stakeholders across departments to gather requirements, identify reporting needs, and design data solutions using Power BI, Excel, and Access Databases.

SUMMIT MATERIALS | Denver, CO - Onsite - Contract **Jan 2018 - May 2018**

Business Data Analyst

- Designed and enhanced Power BI reporting solutions for construction and materials operations, gathering client requirements and delivering actionable insights to evaluate database performance and drive operational decision-making.

BRIAN M. LEWIS LAW OFFICES | Palm Desert, CA - Remote - Part-time **Aug 2012 - Aug 2016**

Data Analyst

Executed the loading, extracting, configuration, validating, and processing of client data using Excel, Access, and SQL. Created detailed reporting and models of client data to streamline legal document preparation.

- Conducted analysis of client data to produce detailed summary reports for estate, gift, and income tax analysis.
- Collated and safeguarded sensitive asset data and business tax information, legal documents, and other pertinent client information.

Personal AI Projects

HOME & RENTAL PROPERTY AUTOMATION | Personal Project **Dec 2025 - Present**

Claude Code | Python | Google Sheets & Gmail APIs | Playwright | PowerShell

- Built scheduled Python programs that pull data from email, websites, and APIs into Google Sheets and Google Calendar, replacing manual tracking for a short-term rental business and feeding a finance dashboard.
- Built Claude-powered agents that read and classify incoming email and documents, extract key details, and log them to Google Sheets.
- Added event-driven email alerts and a daily health monitor that flags failed or stalled jobs, so the system runs unattended.

Education & Professional Development

Bachelor of Science in Mathematics, Minor in Geography, University of Colorado - Boulder | 2016

AI Fluency: Framework & Foundations, Anthropic - Aug 2026

Claude 101, Anthropic - Aug 2026

Claude Code in Action, Anthropic - Oct 2026

Microsoft Certified: Power BI Data Analyst Associate (PL-300) - In Progress

Eagle Scout 2007
